## ITA

Un'antica strada romana, lastricata di pietre levigate dal tempo, affiora in un bosco o da un campo di grano e prende corpo: le geometrie assumono forme tridimensionali e in un originale gioco di volumi danno vita allo schienale del letto Lapis nella versione simmetrica. L'imbottitura degli schienali è in memory foam per un'ottima elasticità, resilienza e indeformabilità.

RETE STANDARD  
STANDARD SLAT

**STANDARD:** Rete con telaio rettangolare, angoli arrotondati e verniciatura in polveri epoxi poliestere cotta a 180°C. Doghe in faggio sagomato a caldo, infilati in appositi alloggiamenti ricavati nel telaio 50x25mm. Elementi di fissaggio in plastica.

**DORSAL:** La complessa struttura di XPoint 400 è composta da elementi tridimensionali Multy Point distribuiti rispettando le fisiologiche caratteristiche della struttura vertebrale. Gli elementi tridimensionali Multy Point a supporto differenziato accolgono la zona spalle, bacino, cosce e polpacci. Ogni elemento Multy Point ha il compito di sostenere il peso del corpo durante il riposo, ne asseconda i movimenti, riducendo al minimo i punti di pressione, per il corretto mantenimento delle curve naturali della colonna vertebrale. Doghe Dorsal a 7 strati altamente performanti. La pellicola che le ricopre ha funzione protettiva antiumidità e la struttura a piccole depressioni crea benefici passaggi d'aria tra la doga e il materasso, per una costante aeratione di tutto il sistema letto. Questa tecnologia consente il completo rilassamento muscolare riducendo i cambi posturali notturni e favorendo un'elevata qualità del riposo.

- 1 Sospensioni a sostegno moderato per l'appoggio della testa
- 2 Sistema MultyPoint per una zona spalle morbida ed accogliente
- 3 Zona lordosi composta da due doppie doghe e sponde diverse per un sostegno graduato. Regolazione a tre altezze e cursori a due livelli di rigidità
- 4 Sistema MultyPoint con sospensioni a sostegno rinforzato per la zona bacino
- 5 Sistema MultyPoint con sospensioni a sostegno moderato per la zona cosce.
- 6 Sistema MultyPoint con sospensioni confortevolmente morbide per la zona polpacci.
- 7 Sospensioni a sostegno moderato per l'appoggio dei piedi

## ENG

An ancient Roman road, paved with cobblestones smoothed by the passing of time, crops up from the woods, or from a grain field, and takes shape: geometries become tridimensional shapes and, in an unique game of volumes, morph into backrest of Lapis Bed, symmetrical version. The backrest fillings are in memory foam for an excellent flexibility, resilience and non-deformability.

Slat system available

**STANDARD:** Slat system with rectangular frame, rounded edges and epoxy polyester powder coating at 180°C. Slats in beech steam-shaped, inserted in lodgings in the frame 50x25mm. Fixing elements in plastic

**DORSAL:** XPoint 400 complex structure consists of MultyPoint three-dimensional elements which are distributed to support the physiological characteristics of the vertebral spine. The MultyPoint three-dimensional elements have different firmness grades to accommodate shoulders, pelvis, legs and calves areas. Each MultyPoint has the task of sustaining the weight of the body during rest, follows its movements minimizing the points of pressure, correctly supporting the natural curves of the vertebral spine. 7-layers high-performing Dorsal slats. The covering film has an anti-humidity protection function, and the structure made of small depressions creates beneficial air passages between the slat and the mattress, for a constant aeration of all the bed. This technology allows the full muscular relaxation and reduces the postural changes during rest, thus helping the highest quality of sleep.

- 1 Moderate support to accommodate the head
- 2 Multi Point system for a soft cosy shoulder zone
- 3 Lower back area comprising two slats and several shores for graduated support. Three height regulations and sliders/tensioners for two types of firmness.
- 4 Multi Point system with reinforced support springs for the hip zone.
- 5 Multi Point system with moderate support for the thigh zone.
- 6 Multi Point system with comfortably soft springs for the calf zone.
- 7 Moderate support suspensions for the feet.
