LASOSPESA

Stefano Boeri Architetti, 2019

FontanaArte calls Stefano Boeri Architetti and launches "lasospesa", the new table lamp. For one of the most important Milanese architects in the world, whose Bosco Verticale is one of the most representative and iconic projects of our time, trying a lamp was an interesting change of scale. Like FontanaArte: historic and contemporary Milan, elegant entrances and new buildings, fashion and major art exhibitions. Like FontanaArte's art: it finds form in an object that does not preclude function and from which a light comes to life. lasospesa is in fact a symmetrical table lamp, born from the elementary principle of the incorporation of two cylinders: a cylinder of primary light suspended in a cylinder of diffused light. "A non-lamp with numerous uses and iridescent luminosity, very simple and classic, lasospesa seems to have always been there, where you placed it" says Stefano Boeri.

Table lamp with diffused light. Metal structure. External diffuser in borosilicate glass available in four different finishes: transparent striped, sandblasted, pink painted, smoked painted. Internal diffuser in painted borosilicate glass. Black power cord, dimmer and plug. Power supply on plug with interchangeable plug (uk - usa - europe - australia). Integrated Led.
